

Pre Fire Planning for Businesses

What is a Pre Fire Plan?

A Pre Fire Plan is an information gathering tool used by fire fighters to get emergency information such as building construction, a drawing of the building, owner/occupant and key holders contact numbers and other information.

This allows us to have all of the pre planned information in a folder for quick information access for any emergency call you may have. This information is gathered for the safety of you, anyone that maybe in your business and the fire fighters that will enter your business to handle the emergency.

A Pre Fire Plan is done twice a year by a team of fire fighters that will visit with you or a designated person, and update any information or construction changes that you may have for your business.

Remember that this Pre Fire Plan is done for everyone's safety please make time to complete this information with the fire fighters. If you have any questions about your business please call the Cabot Fire Department at 501-843-7671.
